Getting Started - Workday

What is Workday?

Workday is the new enterprise software system replacing our student information system (Jenzabar) and its many shadow systems.

It's a centralized and standardized cloud-based application.

After the initial launch in June 2020, Workday enhancements will be added every six months.   These updates ensure Lynn University stays up to date with technology changes, regulatory requirements, and our ever-expanding information needs. Workday Student will be launched March 4, 2024.

Getting Started

Make Sure your Browser Supports Workday

Contact the IT help desk or IT Support (561-237-7979) if you have questions about your browser or experience any issues.
