

# Respondus - Lockdown Browser

This section will show how to download and use the LockDown Browser application on various devices.

LockDown Browser is a custom browser that locks down the testing environment within a learning management system. LockDown Browser is a custom browser that locks down the testing environment within a learning management system. Students cannot print, copy, access other applications, or search the internet during an online exam. Students can also use a webcam to record themselves during an online exam. Afterward, the instructor will make flagged events and proctoring results available for further review.

Respondus. (2022). assessment tools for learning systems. Respondus Monitor.
