Wi-Fi & Campus Network

Description

Information Technology is responsible for maintaining the campus area network and for connecting individuals and groups to Lynn University network resources and the internet. Networking resources include cabling, switches, routers, subnets, IP addressing, DNS, wireless networks, and off-campus access via VPN. Network resources are governed by Lynn University Acceptable Use of Technology policy.

Students

We provide wired and wireless network access to all Lynn University enrolled students. We also provide access (up to 5 devices) to Gaming Consoles, Smart TV's Apple TV's, Roku's.

Faculty and Staff

We provide wired and wireless network access to all Lynn University employees. We also provide VPN services to eligible staff.

Guests

We provide unsecure wi-fi access to guests who may visit campus to connect to the internet.
