

# How-to- Connect to Lynn Resources

Lynn Resources include network drives and intra-net applications hosted on campus. You may require access to these resources when connected to VPN to have an on-campus computing experience. In order to connect to these resources, you must first connect to VPN.

## Step-by-step guide

Please be sure to connect to VPN before completing the steps below. For instructions on how to connect to VPN refer to this [How-to-Article](#).

1. Once connected to VPN and on the Windows Home screen, press the **Windows Key + r**, this will open the Run dialog box
2. Type in **%logonserver%**
3. Press enter
4. Double-click the **netlogon** folder
5. Double-click **SLogic.bat**, this file name may also appear as **SLogic** with the description **Windows batch file**
  - a. This will run Desktop Authority and connect the network resources
  - b. \*\*\*Please wait for the dialog box to close before continuing work\*\*\*
